Re: Briannah Brooks

To Whom it May Concern,

I am writing in support of Briannah Brooks regarding an internship opportunity. The organization which chooses to employ Briannah's skills will unquestionably profit with Briannah serving it.

Briannah is a highly intelligent student with original ideas. As Treasurer of the "I Will Ride" student club, which touts the benefits of High Speed Rail in California, Briannah has distinguished herself as a leader in the club. As Club Advisor, I have witnessed her innovative thoughts regarding issues such as fund-raising. She is not content to sit back and simply participate; Briannah involves herself to the distinct benefit of the organization and campus. It is rare to see a student so involved, so driven, and with such unique ideas, all of which demonstrate a highly analytical mind. I have no doubt that Briannah will immensely benefit the organization for which she serves as an Intern.

What makes Briannah's hard work so valuable is also her intelligence. As her Economics Instructor at Fresno City College, I can attest to her academic abilities. Briannah is scoring a very solid 'A' grade in my Honors Macroeconomics class. She is extremely bright, with excellent problem-solving skills.

When you add to these attributes Briannah's maturity and natural leadership talent, there is no question that she will improve any organization in which she is involved. I very highly recommend Briannah to you.

Sincerely,

Aaron Pankratz

Economics Instructor

Leon S. Peters Honors Program Coordinator
